Using optimism and curiosity to lead technological innovation. I use my experience in leading digitalization projects and hands-on knowledge of software engineering in production as a toolbox. Realizing amazing tech as viable business to customers, and learning new tech makes my clock tick. My core philosophy are (1) performance is achieved via effort - if you don't know enough then learn! (2) Don't be the smartest person in the room! (3) Have the courage to stand out and spread courage to others since it is needed for tough decisions and being innovative!
