

CURRICULUM VITAE – ADAM JACOBS

INFORMATION

Adam Jacobs
tel: +46704799492
email: *adamjac@kth.se*

I study Computer Science because my goal is to innovate how regular people live and enter a field that requires constant learning throughout life. Leading digital change is my passion! One of my first professional projects was an app for my high school that helped students and teachers share their IT knowledge with newly arrived students, which taught me early on that nothing changes by itself - take initiatives and learn what you need to change the world! In my free time I enjoy staying updated with current events, playing drums and singing with my band in order to relieve stress for the next week. I also continuously reflect upon what I've learnt and done the latest time, in order to get new ideas and always be one step ahead.

CORE VALUES

Rethink what you are doing. Being able to stop and reflect and perhaps change your ways is an important aspect.
Diversity helps us empower each other with many different skills and experiences which is needed in our complicated world
Performance is achieved via effort and not how smart you are. There are no limits.

EDUCATION

KTH Computer Science (2016-2021)
Technology Rudbeck Gymnasium in Sollentuna (2013-2016)
Leadership course for children summer camps (2014-2015)
