

CURRICULUM VITAE – ADAM JACOBS

INFORMATION

Adam Jacobs
Skånegatan 101
116 35 Stockholm
tel: +46704799492

PROFILE

I study Computer Science because my goal is to innovate how regular people live and enter a field that requires constant learning throughout life. One of my first professional projects was an app for my high school that helped students and teachers share their IT knowledge with newly arrived students. This project taught me early on that nothing changes by itself - take initiatives and learn what you need to change the world! In my free time I enjoy staying updated with current events, and playing drums and singing with my band in order to relieve stress for the next week.

CORE VALUES

My favourite thing is developing awesome things by constantly learning, which is reached by following my core values:

Diversity helps us empower each other with many different experiences which is needed in our complicated world

Rethink what you are doing sometimes. Being able to stop and reflect and perhaps change your ways is an important aspect.

Performance is achieved via effort and not how smart you are. There are no limits.

EDUCATION

KTH Computer Science (2016-2021)

Technology Rudbeck Gymnasium in Sollentuna (2013-2016)

Leadership course for children summer camps (2014-2015)
