CURRICULUM VITAE – ADAM JACOBS

INFORMATION

Adam Jacobs
tel: +46704799492
email: jacobs_feld@hotmail.com

Using optimism and curiosity to lead technological innovation. I use my experience in leading digitalization projects and hands-on knowledge of applying technology as a toolbox. My clock ticks when I work towards realizing amazing technologies and making it available as viable business to the customers. As a current board member of THS I'm also used to making strategic decisions that affect people in a big organisation.

CORE VALUES

Listen! There's always someone that knows more than you on a specific subject. Effective leadership is complementing your own skills with the expert knowledge of others.
Performance! It is achieved via effort and not how smart you are. There are no limits. If you don't know enough, then increase your effort more than ever before!
Courage! Making tough decisions, standing out and being innovative takes courage. I like to spread it to others since it will then spread back to you in other ways.
